Projects

MOVIE TMDB

- React-powered TMDB Project revolutionizes movie browsing with its sleek interface and lightning-fast performance.
- Built on React, it offers seamless navigation and real-time updates, enriching the user experience.
- Featuring rich movie data from TMDB, it's a dynamic hub for film enthusiasts

COUNTER APP WITH JEST

- Created a Counter App using React, featuring increment and decrement buttons to adjust a displayed count.
- Set up a Jest testing environment to ensure functionality
- Written tests to verify the initial count, button interactions, and state updates.
